COMPETENCE EVALUATION KEY POINTS

Organogram

Verify organogram and understand different certification functions and responsibilities

EMS Technical areas

- Verify the certification body's EMS Technical Areas as this will highlight clarify related to competence of auditors per technical area. Verify that when personnel leave the employment of the CB, the CB performs an evaluation of the impact this has on the overall competence of the CB. For example, it is possible that an auditor, competent in a specific EMS technical area, leaving the employment of a CB could result in it no longer being able to demonstrate competence in that particular technical area. Under such circumstances SADCAS shall seek evidence that the CB has identified the limitations to its overall competence and the effect on existing certifications.

ANNEXURE D: ISO/TS 22003:2013: FOOD SAFETY MANAGEMENT SYSTEMS - REQUIREMENTS FOR BODIES PROVIDING AUDIT AND CERTIFICATION OF FOOD SAFETY MANAGEMENT SYSTEMS

CRITERIA: ISO/TS 22003:2013		CB'S REFERENCES	COMMENT BY ASSESSOR
9.1	General Requirements		
9.1.1	The CB defines the relevant scope for organizations applying for certification		
	Activities, processes, products or services that can influence the food safety of the final product as defined in the scope of certification are not excluded.		
9.1.2	The CB has a process for selection of audit day, time and season so as to provide the audit team an opportunity of auditing the organization operating on a representative number of product lines, categories and sub categories covered by the scope of certification.		
9.1.4	The CB has a documented procedure for determining audit time for each client to determine the time needed to plan and accomplish a complete and effective audit of the client's FSMS.		
	The audit time determined by the CB and justification for the determination are recorded.		
9.1.5	Certification of multi-site organizations		
9.1.5.2	The CB can certify a Multi-site organization under one management system provided the following conditions apply:		
a)	All sites operate under one centrally controlled and administered FSMS (or equivalent)		
b)	An internal audit has been conducted on each site within one year prior to certification		
c)	Audit findings of individual sites are considered indicative of the entire system and correction implemented accordingly		
9.1.5.3	Multi-site sampling is only applicable for categories A, B, E, F and G and for organizations with more than 20 sites operating similar processes within these categories.		
	This applies to initial, surveillance and recertification audits		

CRITERIA: ISO/TS 22003:2013		CB'S REFERENCES	COMMENT BY ASSESSOR
	The CB is able to justify decisions taken on sampling of multi-site certification		
	The annual internal audit programme includes all sites of the organization when multi-site sampling is permitted		
9.1.5.4	The CB utilizes a sampling programme to ensure effective audits of the FSMS and applies to:		
a)	Organizations with less than 20 sites, all sites are audited		
	The sampling ratio for more than 20 sites shall be 1:5 sites		
	Sites are randomly selected, and after the audit, no sites are nonconforming (threshold not exceeded)		
b)	The CB audits the central office for the FSMS at least annually		
c)	The CB performs surveillance audits at least annually on the required number of sampled sites		
d)	Audit findings of sampled sites are considered indicative of the entire system and corrections are taken accordingly		
9.1.8	The CB provides a written report for each audit.		
	Audit team may provide OFI but does not recommend specific solutions.		
	The CB retains ownership for the maintenance of the audit report		
	The report includes information pertaining to:		
	- The relevant PRP's		
	- Hazard analysis method used		
	- Comments regarding the food safety team		
	- Other issues relevant to the FSMS		

CRITERIA: ISO/TS 22003:2013		CB'S REFERENCES	COMMENT BY ASSESSOR
9.2			
9.2.1	Application		
	The CB requires applicant organization to provide detailed information concerning:		
	- Process lines		
	- HACCP studies		
	- Number of shifts		
9.2.3	Initial certification audit		
	Initial audit conducted in 2 stages (stage 1 and stage 2)		
9.2.3.1	Stage 1		
9.2.3.1.2	Stage 1 objectives are met in terms of planning for stage 2 and gaining an understanding of the organizations FSMS and the state of preparedness for stage 2 by reviewing:		
a)	That the organizations identification of PRP's are appropriate to their business (regulatory, statutory, customer and certification scheme requirements)		
b)	The FSMS includes adequate processes and methods for the identification and assessment of the organization's food safety hazards, subsequent selection and categorization of control measures		
c)	Relevant food safety legislation is implemented		
d)	The FSMS is designed in order to achieve the organization's food safety policy		
e)	The FSMS implementation programme justifies proceeding to the audit (stage 2)		
f)	The validation of control measures, verification of activities and improvement programmes conform to FSMS requirements		

CRITERIA: ISO/TS 22003:2013		CB'S REFERENCES	COMMENT BY ASSESSOR
g)	The FSMS documents and arrangements are in place to communicate internally and with relevant suppliers, customers and interested parties		
h)	There is any additional documentation which needs to be reviewed or information that needs to be obtained in advance		
	If an organization has implemented an externally developed combination of control measures, the stage 1 includes review of documentation in the FSMS to determine a combination of control measures:		
	- Is suitable for the organization		
	- Was developed in compliance with the requirements of ISO 22000		
	- Is kept up to date		
	When gathering information, the CB checks the availability of relevant authorizations regarding compliance to regulatory aspects		
9.2.3.1.3	Stage 1 audits are conducted at the client's premises. Where exceptions to this requirement are made by the CB, they are justified.		
9.2.3.1.4	The CB informs the client of results obtained during Stage 1 which may lead to postponement or cancellation of the Stage 2 audit.		
9.2.3.1.5	The parts of the FSMS that are found to be fully implemented and effective during the Stage 1 audit need not be re-audited during the Stage 2 audit but the CB confirms continual conformance and states in the audit report those area's already addressed during the Stage 1 audit.		
9.2.3.1.6	The interval between Stage 1 and Stage 2 audits do not exceed 6 months. Stage 1 audit is conducted again where the time frame lapses.

Review of additional documents. Comment on adequacy

--

Additional /General Comments (This space may be used for General Comments in the case of Document Review)

Below are some examples of general comments for different situations encountered. Follow your instincts and use these general comments to highlight areas you feel may require specific attention.

Example 1:

This could be where you notice from the application form or date on documents that the system has only been documented/implemented for a short period of time. Or where it is clear that there is no clear direction given in the documentation, no "hows" described.

Please note that for the initial assessment sufficient records generated by the system must be available to demonstrate implementation of the system to give confidence that the CAB can consistently operate in accordance with the relevant requirements.

Example 2:

Quality documentation is meant to be of benefit to a CAB. The Policies set by management give the overall direction of the CAB. The Objectives are always in line with the policies, usually measurable by some means, more specific to areas and may change. The Procedures are the instruction manual defining how the CAB operates to enable it to achieve the set objectives and thus continue moving in the planned direction as defined by the policies.

Example 3:

Although the documentation submitted appeared to be written in accordance with the Standard, there was very little direction given to the user thereof. Statements of fact were generally made but detail on how the CAB was to achieve these requirements was lacking.

Example 4:

The specific notes made during the evaluation are not necessarily non-compliances, but sometimes areas of lack of clarity that could become obvious during the on-site assessment.

Example 5:

The documentation submitted was deemed to be assessable and appeared to be in general compliance with the requirements of ISO/IEC 17021-1. Whether the CAB's actual operational procedures are reflected in the Quality documentation can only be determined on-site at the initial assessment.

Example 6:

Use of terms that are open to interpretation, such as "where appropriate" and "if possible", are not suitable as they do not give clear direction to the user to ensure consistency within the CAB.

Be wary of stating that the manual is excellent / in full compliance with the standard as this may cause problems when the site visit reveals weaknesses overlooked during the doc review.

1. RECOMMENDATION

Example 1:

The deviations listed should be incorporated into the quality manual, after which an initial assessment of the CAB may be arranged.

Example 2:

The manual requires revision and re-submission for evaluation, after which an initial assessment of the CAB may be arranged.

Example 3:

The deviations listed require a submission of additional documents or information to conclude the Document review process after which an Initial assessment may be arranged.

NOTE: Where the recommendation is not to proceed with further assessment, this must be clearly justified.

NOTE 2: If there is evidence of fraudulent behaviour, if the CAB intentionally provides false information or if the CAB conceals information, please contact the Accreditation Manager immediately to reject the application or terminate the assessment process.
